

STANDGUARD SECURITY security monitoring and auditing

<http://www.bytware.com/ns/>

By design, the System i is one of the most reliable and secure computers in the business community today. Yet security-related events can still occur unnoticed. Controlling access to data should be a primary concern of all companies. StandGuard Security is a comprehensive security solution that focuses on events occurring against specific libraries and objects by combining three critical security tools: Exit Point Monitoring; Security Audit; and QAUDJRN Monitoring.

What customers have to say about Bytware...

"Every Bytware product is top-notch, and Bytware people bend over backwards to help customers. We know we can call at 3 o'clock in the morning and we'll reach someone who can help us That's the kind of people Bytware has. They'll work with you. That's why we've bought the whole Bytware suite." —Bob Allison, CGI Group, Inc.

Exit Point Monitoring

- Simple object-based approach.
- Monitors and manages access.
- Defines user access permissions.
- Monitors FTP, ODBC, JDBC, and SQL.

Policies & Procedures Management

- Combines three critical security tools.
- Protects specific libraries and objects.
- Ensures consistent enforcement of policies.
- Improves user experience and efficiency.

Security Monitoring

- Real-time monitoring of QAUDJRN.
- Monitors authority failures and profile changes.
- Provides real-time alerts of potential problems.
- Triggers notifications on specified events.

Reporting & Compliance

- Boosts your compliance efforts.
- Compares your security against "best practices."
- Generates a wide range of reports.
- Helps meet documentation requirements.

System Security Audit

- Checks system authority settings.
- Analyzes user profile authority.
- Exposes areas of vulnerability.
- Audits Business Asset libraries or all libraries.

Easy Implementation

- Ships with three predefined roles.
- "Learn" function for non-intrusive setup.
- Easy rules creation and management.
- Integrates with notification solutions.
